DESC Response to Sierra Club 1-19

**DOMINION ENERGY SOUTH CAROLINA, INC.
SIERRA CLUB'S FIRST SET OF DATA REQUESTS
DOCKET NO. 2020-125-E**

REQUEST NO. 1-19:

Has the Company evaluated whether the Williams and Wateree coal plants will require additional investments to comply with final, proposed, or possible future environmental regulations including, but not limited to: existing consent decrees, new source review provisions, coal combustion residuals, effluent limitation guidelines, national ambient air quality standards, cooling water intake standards, the cross-state air pollution rule, the mercury and air toxics standards, regional haze, and carbon dioxide emissions?

- a. If not, please explain why not.
- b. If so, please provide a summary, organized by electric generating unit, briefly describing the additional investments, including the purpose, and capital and annual O&M costs of such investments.
- c. Please also include all supporting analyses, calculations, data, documents, modeling input and output files, and workpapers associated with each investment.

RESPONSE NO. 1-19:

Yes.

a. Not applicable.

b. Williams and Wateree coal plants are in full compliance with new source review provisions, coal combustion residuals, effluent limitation guidelines, national ambient air quality standards, cooling water intake standards, the cross-state air pollution rule, the mercury and air toxics standards, regional haze, and carbon dioxide emissions. Neither location is operating under a consent decree.

DESC cannot predict the Capital and O&M budgets that will be necessary for technology installations required to meet environmental regulatory requirements that have not yet been determined for any DESC facilities. Final technology needs are determined after SCDHEC (or other regulatory authority) completes a determination for each of the affected facilities.

c. DESC has not made plans for additional capital investment in either Williams or Wateree to comply with final, proposed, or possible future environmental regulations including, but not limited to: existing consent decrees, new source review provisions, coal combustion residuals, effluent limitation guidelines, national ambient air quality standards, cooling water intake standards, the cross-state air pollution rule, the mercury and air toxics standards, regional haze, and carbon dioxide emissions.
